SUMMARY

Flexvis is a cryptocurrency that provides utility functions and insurance protocol to protect investors funds and prevent investment loss. It is fully decentralized and provides realistic profit that allows investors to make money while enjoying their social time online. It is a rare gem on the blockchain considering the newly introduced insurance protocol for an insured investment.

Flexvis allow investor to flex their investment and earn more using the **FlexGame**, **FlexMetaverse** and **SocialFlex** platform.

We can simply say that **Flexvis** is enriching investment by adding values. This is why introducing and bringing Flexvis into blockchain is important to make sure that investors are able to maximize their profit and get high rewards for their investments. Flexvis provides insured and regular investment with an added value for investors by allowing them to have a great time performing social activities and at the same time making money.

Flexvis is an innovation and first of its kind because of how its utility services smart contract is designed. Flexvis smart contracts provides a unique insurance protocol with an insured investment option.

Flexvis Insurance Protocol ensures that investor either make profit or get their invested amount back regardless of the market condition. It is recommended to create an investment using Flexvis insurance protocol in order to protect investor funds.

Flexvis is designed to support utility functions using the **FlexGame**, **SocialFlex** and **FlexMetaverse**. It is more than just a token because it is fully decentralized and secured on the blockchain with millions of users performing daily transaction on the **FlexGame**, **SocialFlex** and FlexMetaverse platforms with high rewarding profits.

In a simple sentence, Flexvis protects your investment and gives realistic profit while enjoying your social time online.

FLEXGAME is special Play2Earn game that was created as part of our Utility services in a new dimension. It comes with interesting games and is completely fun because player can earn more Flexvis token with it. It is also part of our services that allows user to earn more money by playing the various games we have incorporated into the platform.

SOCIALFLEX is just one aspect of Flexvis utility service that is built as a social media platform where our investors can earn money while enjoying their social time online. It is also designed to promote the use of NFT(s), using NFT for social profile pictures, exploring creative ideas. It comes with a lot of social activities tool and rewarding system. SocialFlex is designed to be the future of the social community on the web3 space.

FLEXMETAVERSE is a special world with a lot of activities that allows our investor to explore the metaverse, earn money on the metaverse which can be easily converted to a real money using Flexvis as the reward token.

How to get Flexvis tokens?

Getting Flexvis is a straight forward process by using any of the options below;

1. Buying from our limited sale ("Presale")
2. Buying from pancake swap ("Decentralized Exchange")
3. Limited time Airdrops
4. Referral programs and events

Our Aim & Goal

Our aim is specifically to protect our investors funds and at the same time reward them, give them access to our services for free and let them earn more. Outline of what we are aiming at are;

1. To protect investors funds and investments
2. To reward investors using our services such as FlexGame, FlexMetaverse and SocialFlex
3. To reduce investment risks
4. To ensure that investors can plan their vacation, purchase their dream car and house with our rewarding system
5. To improve security measures on the blockchain and make it safer for investment.

FLEXVIS TOKENOMICS

Flexvis token distribution and token economy was carefully crafted out to ensure its continuous growth and to withstand various market conditions. It is not designed to be a trading token. It is designed to be a utility token to support FlexGame, FlexMetaverse and SocialFlex activities.

FLEXVIS | Ticker: FLX

Max supply is 10,000,000

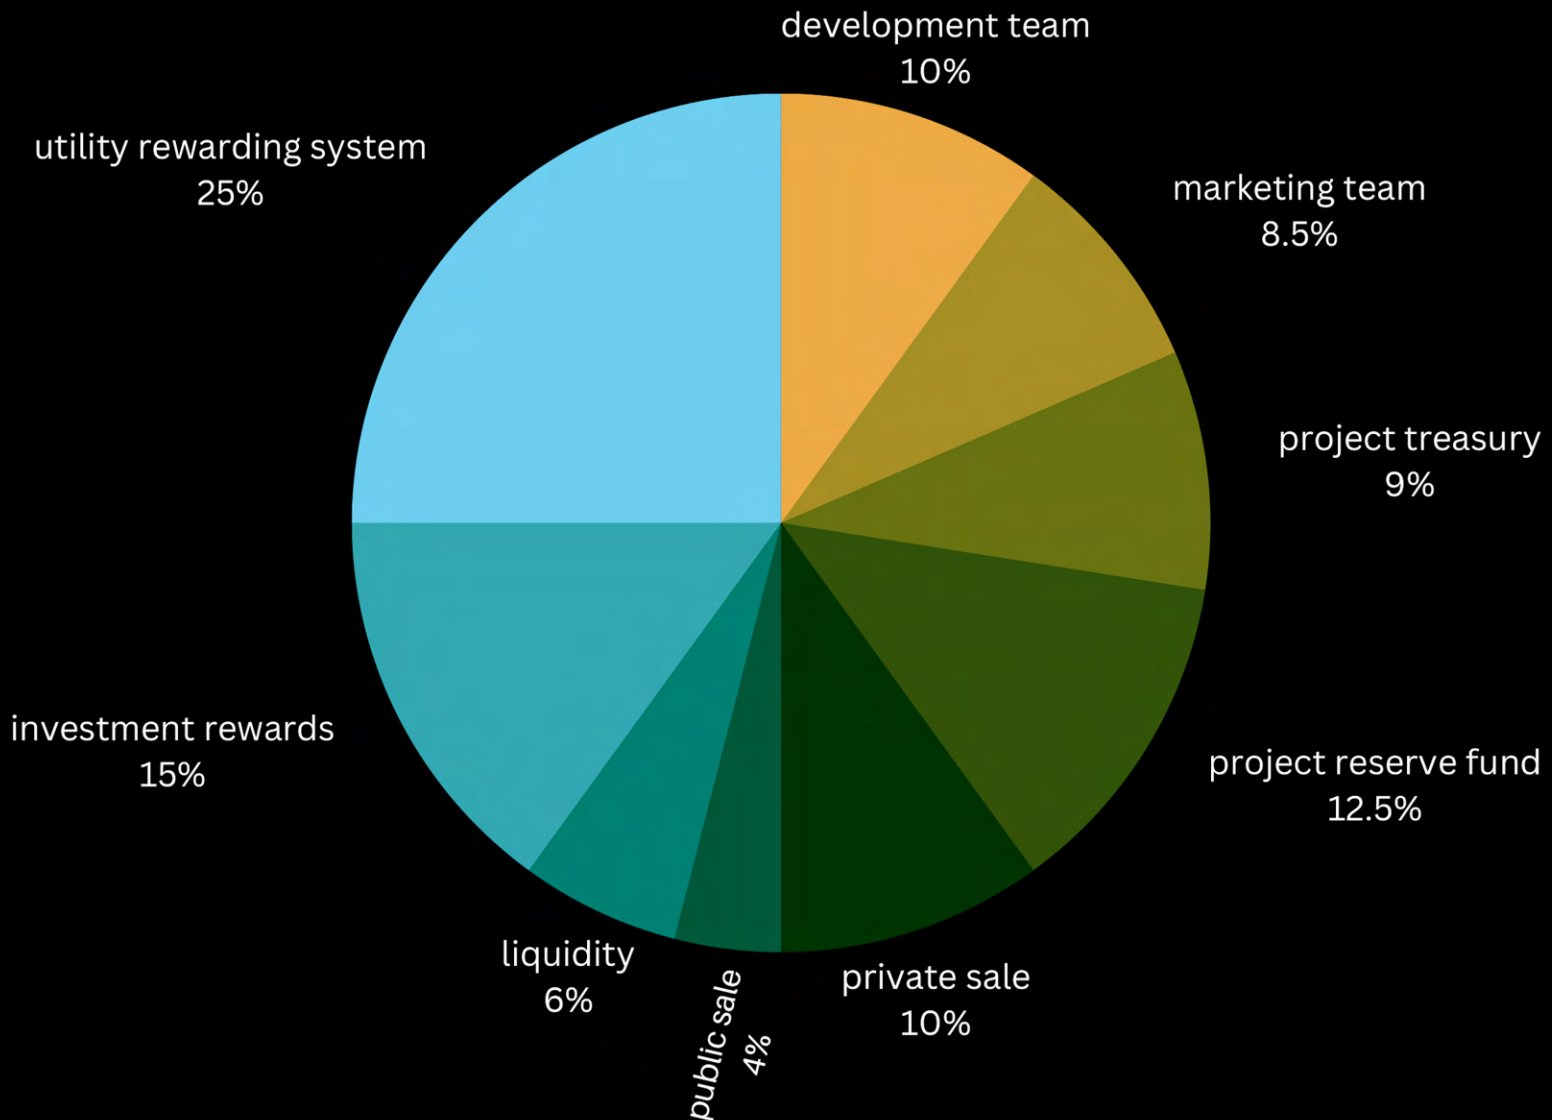

1,000,000 (10%)	-	Development
850,000 (8.5%)	-	Marketing
900,000 (9.0%)	-	Project Treasury
1,250,000 (12.5%)	-	Project Reserve Funds
1,000,000 (10%)	-	Private Sale locked & vested for 2 months
400,000 (4%)	-	Public Sale
600,000 (6%)	-	Liquidity
1,500,000 (15%)	-	Investment Rewards
2,500,000 (25%)	-	Utility Rewards

FLEXVIS Token Distribution

Ticker: FLX

Max supply is 10,000,000

- All addresses holding FLEXVIS token for development, marketing, treasury and reserve fund are all Multi-Sig to make sure they are safe and secure.
- Anyone can burn FLEXVIS
- FLEXVIS contract is completely decentralized

FLEXVIS IDO & PRESALE

PUBLIC PRESALE

The minimum amount that can be used in buying FLEXVIS during presale is 0.005BNB and the maximum amount is 10BNB at once on a single transaction (but can buy in multiple of 0.005BNB or 10BNB).

1. The rate, wallet and token to be sold will be provided when deploying the presale smart contract
2. We plan on using the rate of 1 FLEXVIS = 0.005 BNB

- Wallet is the address all the funds will be forwarded to. It will be forwarded immediately after every purchase except for vested token on private presale.
- For example, if we are planning to sell 150,000 Flexvis which means we are raising 750 BNB.
- This presale is going to last for some weeks (e.g. 2 weeks) and If we can sell all the FLEXVIS before the speculated week (e.g. 2 weeks), we close it immediately. We can also extend the duration of the presale.
- When the max cap is reached or the duration has elapsed, the presale closes automatically.
- You can only withdraw your FLEXVIS token when the presale is over.

Strategic Seed Rounds

Private Sale Round A

500,000 Tokens [1 FLX = 0.004 BNB] @2,000 BNB

Strategic Sale Round B

500,000 Tokens [1 FLX = 0.004 BNB] @2,000 BNB

Public Sale C

400,000 Tokens [1 FLX = 0.005 BNB] @2,000 BNB

Liquidity (Pancakeswap)

600,000 Tokens [1 FLX = 0.006 BNB] @3,600 BNB

FLEXVIS INVESTMENT

There are two types of investment;

- Insured Investment (Recommended)
- Regular investment

- INSURED INVESTMENT (recommended)

- 1 year generates a 70% return
- 3 years generates a 200% return
- 5 years generate a 400% return.

-Note that insured investment protects you from loss and reduce your investment risks.

-10% of your invested amount is required to insure your investment

- REGULAR INVESTMENT

- 7 days generates a 0% return
- 1 month (30 days) generates a 4% return
- 6 months (180 days) generates a 30% return
- 1 year generates a 70% return
- 3 years generates a 200% return
- 5 years generate a 400% return.

Note:

- The longer the investment duration, the higher the reward.

- You can invest as many time as you like.

Insured Investment (Recommended)

Flexvis Insured Investment is a type of investment that prevent investors from losing their invested funds. It makes use of an insurance protocol to ensure that the investor is either at profit or can withdraw up to their initial capital regardless of the market condition.

How does this work?

Flexvis Insured Investment makes use of the insurance protocols in which your invested amount and investment return is measured with the current USD price of FLEXVIS estimated at the time of creating the investment and at the time of ending investment.

At the time of ending your investment, the protocol check for the current USD price of FLEXVIS you are about to withdraw and match it with the initial USD price of the FLEXVIS that was invested. If the current USD price is greater than the initial USD price then your invested FLEXVIS is at profit and can be withdrawn. Therefore, you will get your normal Flexvis reward.

Otherwise, if at the time of ending your investment and the protocol check for current USD price of FLEXVIS you are about to withdraw and match it with the initial USD price of the FLEXVIS that was invested. If the protocol detects that the current USD price of FLEXVIS about to be withdrawn is lower than the initial USD price of FLEXVIS that you invested then more FLEXVIS is given to you to match with the initial USD price of the invested FLEXVIS to prevent you from loss then that can be withdrawn.

For example,

At the time of investing 100 FLEXVIS for 365 days (1year) which generates a 70% return , your total return will be calculated as 170 FLEXVIS.

10% of 100 FLEXVIS is required to create insured investment

10% of 100 FLEXVIS = 10 FLEXVIS

i.e. Total amount of FLEXVIS to be deducted will be

110 FLEXVIS

If 100 FLEXVIS equals 150 USD at the time of creating the investment, the exact USD amount you invested is recorded as 150 USD

First Scenario;

At the time of ending your matured investment, the calculated return of 170 FLEXVIS is converted back to USD. If by that time 170 FLEXVIS = 500 USD. (now at profit).

Then, you can proceed to withdraw or end your investment at profit.

Second Scenario;

At the time of ending your matured investment, the calculated return of 170 FLEXVIS is converted back to USD. If by that time 170 FLEXVIS = 100 USD. (at loss).

Then more FLEXVIS is minted back to make sure you can withdraw up to your initial invested amount of 150 USD

Then, you can proceed to withdraw or end your investment getting back up to your invested amount.

Regular Investment

Flexvis regular Investment is a type of investment that is popularly used on the blockchain and follow the normal smart contract protocol that work with the crypto market condition.

How does this work?

Regular investment does not protect your funds and you are exposed to higher investment risks.

It works by giving you reward on your invested FLEXVIS based on our reward plan and your total return that is withdrawn can be valued at the current market price of FLEXVIS/BNB or FLEXVIS/BUSD.

We recommend the use of our insured investment plan to protect your funds and investments which requires just paying an additional 10% of your invested FLEXVIS token and make sure you don't run at loss.

For Example

If you invest 100 FLEXVIS for 30 days you are expected to get a 4% bonus provided that your investment is already matured before ending it.

4% of 100 FLEXVIS is 4 FLEXVIS meaning that you get an extra 4 FLEXVIS with your principal after 30 days. However, if after 30 days, the price of Flexvis goes down or goes up, you only get back 102 FLEXVIS. It is constant.

INVESTMENT CONSIDERATION

- If you end your investment early, 50% of your principal + 1% of your reward will be sent back to you while 50% of your principal + 99% of your reward will be burnt and sent to our burn address to help reduce circulating supply.
- If you end your investment early within the last day of your investment and 14 days grace period, your total principal + total reward will be calculated and sent to you.
- However, if you end the investment after the 14 days grace period, only your principal will be sent back to you and your reward will be sent to our treasury. This is to make sure that any investment created are monitored by the investors that created them.

TREASURY

The FLEXVIS treasury is mainly designed to protect our investors funds by using some algorithm in the project development which comprises of;

- 1.The additional 10% that is used for creating insured investment goes to the treasury
- 2.Reward for investments that are ended after the grace period are sent to the treasury
- 3.The treasury hold 10% of the total max supply of FLEXVIS token to guarantee and upkeep the insured investments as well.

The treasury can also be used to buy back FLEXVIS token to reduce circulating supply and some amount of the treasury can be converted to a stable coin to support insured investment and general growth of the project.

UTILITIES

FLEXVIS is making use of a lot of utilities options to make sure and increase the demand of FLEXVIS token for daily activities. Some of the utilities provided are;

FLEXGAME

- Game access and item purchase: FLEXVIS token is used in playing any of the games available on the FLEXGAME portal and for buying FLEXGAME coins or points.
- Multiplayer Rewards: FLEXVIS token can be used to play multiplayer games by making 2 or more players connect to a room after contributing a certain amount of FLEXVIS token whereby the winner wins the total amount.
- Predicting game outcomes: FLEXVIS token can be used for predicting outcome of a game which is available on some of our games.
- General Participation Rewards: FLEXVIS token can be used for giving out rewards in participation in some of our games.

FLEXVIS INVESTMENT

- Game access: FLEXVIS investments is used to grant access to FLEXGAME platform.
- FLEXGAME points: FLEXVIS investments can also be used to award FLEXGAME points.

SOCIALFLEX

- NFTs avatar purchase: FLEXVIS token can be used to purchase or mint NFTs avatar that are available on the SOCIALFLEX platform.
- Content Creation: FLEXVIS token can be used for creating contents which are considered to generate more FLEXVIS tokens for the creators.
- SOCIALFLEX participation: FLEXVIS token can be used for rewarding active users on the SOCIALFLEX platform.
- General Participation Rewards: FLEXVIS token can be used for giving out rewards in participating in some SOCIALFLEX activities.

FLEXMETAVERSE

- Metaverse Access: FLEXVIS token can be used to purchase or buy the available metaverse world created for exploring and gameplay.
- Metaverse Reward: FLEXVIS token can be used for some rewarding activities performed on the FLEXMETAVERSE.

ROADMAP

2022 Q4

- PRIVATE SALE
- SMART CONTRACT DEVELOPMENT
- FLEXGAME UNVEIL

2023 Q1

- IDO
- LISTING ON DEX
- INSURED/REGULAR INVESTMENT LAUNCH
- LISTING ON CMC, COINGECKO
- EARNING WITH FLEXGAMES
- FLEXGAME UPGRADES
- PARTNERSHIP
- LISTING ON CEX

2023 Q2

- SOCIALFLEX
- EARNING WITH SOCIALFLEX
- SOCIALFLEX NFTs AVATAR
- SOCIALFLEX VIP PORTAL CREATION
- SOCIALFLEX CREATOR EARNING OPTION

2023 Q3

- SOCIALFLEX IMPROVEMENT
- MORE SOCIAL ACTIVITY TOOLS DEVELOPMENT
- LISTING ON MORE CEX
- CREATING ADVERT TOOLS FOR SOCIALFLEX

2023 Q4

- FLEXMETAVERSE DEVELOPMENT
- CREATING FLEXMETAVERSE WORLD
- CONNECTING ALL FLEXMETAVERSE WORLD TOGETHER
- EARNING WITH FLEXMETAVERS
- MORE ADOPTION

DISCLAIMER

RISKS

FLEXVIS is a project that is still undergoing a lot of development process and there are possibilities of encountering some unforeseeable risks. With this you acknowledge and agree that FLEXVIS might have numerous risks associated with it which includes buying FLEXVIS token, holding FLEXVIS token, locking/investing FLEXVIS token and using FLEXVIS token for participation in FLEXGAME, SOCIALFLEX and FLEXMETAVERSE. In the worst scenario that is not predicted, this could lead to the loss of all or part of FLEXVIS token held.

IF YOU DECIDE TO ACQUIRE FLEXVIS token OR PARTICIPATE IN FLEXGAME, SOCIALFLEX and FLEXMETAVERSE, YOU EXPRESSLY ACKNOWLEDGE, ACCEPT AND ASSUME THE RISKS ASSOCIATED WITH IT WHICH HAS BEEN CLEARLY STATED ON OUR DICLAIMER PAGE
